Fujian Morefun Electronic Technology Co.,Ltd.

MORE FUN

Company profile

Driven by the dream and desire to create a world class company manufacturing and marketing POS terminals, Morefun was formed in March 2015 by six friends and a team of R&D and Manufacturing professionals who had work together for more than fifteen years.

With dedication and perseverance, the founders of the company have nurtured an organization where teams cooperate and strive for excellence and innovation.Our focus on R&D, product quality and efficient manufacturing has helped us launch a wide range of POS terminals for acceptance of QR Code, Mobile and Card based payments that cater to a broad spectrum of retail and agency banking requirements in several countries.

Our Motto

To deliver excellence with honesty, hardwork and dedication.

Our Strategy

To create value through product and process innovation, efficient engineering and manufacturing thus helping our partners reduce time to market and lower cost of service delivery with our payment terminals.

Our Objective

To provide the best outcomes for our employees, partners and end-users who willingly become our advocates helping us attract the best employee talent and high growth partners that deliver payment solutions to a wide base of diverse users across the globe.
